

PRESS RELEASE

Equinor opens office in Copenhagen

With its long history as a frontrunner within renewable energy, Denmark holds a lot of experience and competence within development and production of renewable energy. By opening an office in the Danish capital, Equinor wishes to build an even stronger foothold in the country focusing on both business opportunities and recruitment.

“Northern Europe is very important for us and having access to the right competence and experience to succeed in such a mature renewables market is vital. By establishing a Copenhagen office, we strengthen our ability to attract people with the right experience and skills. In addition, Denmark holds future business opportunities within renewables, and having a permanent base will put us in a better position to assess these,” says Trine Borum Bojsen, senior vice president for Europe in Equinor Renewables.

To date, Equinor is already present in Denmark through the energy trading house Danske Commodities, and the leading solar developer BeGreen.

CEO of Danske Commodities, Helle Østergaard Kristiansen, will continue to be country manager for Denmark. “As Equinor develops as a broad energy company, we look forward to a strong Equinor Renewables presence in Copenhagen, complementing Danske Commodities’ offices in Aarhus and Copenhagen,” says Østergaard Kristiansen.

The new office will be in Ny Carlsberg Vej 80, in the Carlsberg city district.

About Equinor:

Equinor is a broad, international energy company committed to long-term value creation in a low-carbon future. Our purpose is to turn natural resources into energy for people and progress for society. We aim to be a leading company in the energy transition and become a net-zero energy company by 2050.
