# Introduction

Equinor has prepared a report on payments to governments in accordance with the Norwegian Accounting Act §2-10 and the Norwegian Security Trading Act §5-5a. The companies involved in extractive and logging activities are required to disclose payments made to governments at project and country level and additional contextual information, consisting of certain legal, monetary, numerical and production volume information, related to the extractive part of the operations or to the entire group.

## Executive summary

Equinor is engaged in upstream activities in several countries across the globe. In 2024, the countries where Equinor made payments to governments included Algeria, Angola, Argentina, Azerbaijan, Brazil, Canada, Libya, Netherlands, Nigeria, Norway, the UK and the USA. The total value contribution from these upstream activities in host countries amounts to USD 23 billion, of which taxes paid amounted to USD 20 billion, whereas royalties, fees, bonuses, and host government entitlements amounted to USD 3 billion.

# Basis for preparation

The regulation requires Equinor to prepare a consolidated report for the previous financial year on direct payments to governments, including payments made by subsidiaries, joint operations and joint ventures, or on behalf of such entities involved in extractive activities. These activities include exploration, prospection, discovery, development and extraction of oil and natural gas.

# Reporting principles

The report includes payments made directly by Equinor to governments, such as taxes and royalties. Payments made by the operator of an oil and/or gas licence on behalf of the licensed partners, such as area fees, are also included in this report. For assets where Equinor is the operator, the full payment made on behalf of the whole partnership (100%) is included. No payment will be disclosed in cases where Equinor is not the operator, unless the operator is a state-owned entity and it is possible to distinguish the payment from other cost recovery items.

Host government production entitlements paid by the licence operator are also included in the report. The size of such entitlements can in some cases constitute the most significant payments to governments.

For some of our projects, we have established a subsidiary to hold the ownership in a joint venture. For these projects, payments may be made to governments in the country of operation as well as to governments in the country where the subsidiary resides.

Payments to governments are reported in the year that the actual cash payment was made (cash principle). Amounts included as contextual information are reported in the year the transaction relates to (accrual principle), regardless of when the cash flows occurred, except for Income tax paid (cash principle). Amounts are subject to rounding. Rounding differences may occur in summary tables.

## Government

In the context of this report, a government is defined as any national, regional or local authority of a country. It includes any department, agency or undertaking (i.e. corporation) controlled by that government.

## Project definition

A project is defined as the operational activity governed by a single contract, licence, lease, concession or similar legal agreement and that forms the basis for payment obligations to a government.

Payments not directly linked to a specific project but levied at the company entity level, are reported at that level.

## Materiality

Payments constitute a single payment, or a series of related payments that equal or exceed 800,000 NOK (USD 70,400) during the year. Payments below the threshold in a given country will not be included in the overview of projects and payments.

## Reporting currency

Payments to governments in foreign currencies (other than USD) are converted to USD using the average annual 2024 exchange rate.

## Reporting segments

Equinor's payments to governments are made through the reporting segments Exploration & Production Norway, Exploration & Production International and Exploration and Production USA. For more information on Equinor's reporting segments, reference is made to the 2024 Integrated annual report published on our website: [equinor.com/reports](http://equinor.com/reports).

## Payment types disclosed at project or legal entity level that are relevant for Equinor

The following payment types are disclosed for legal entities involved in extractive activities. They are presented on a cash basis, net of any interest expenses, whether paid in cash or in-kind. In-kind payments are reported in millions of barrels of oil equivalent and the equivalent cash value.

- Tax levied on the income, production or profits of companies includes severance tax and taxes paid in-kind. The value of taxes paid in-kind is calculated based on the market price at the time of the in-kind payment. Taxes levied on consumption, such as value added tax, CO<sub>2</sub> fees, personal income tax, sales tax, withholding tax, property tax and environmental tax are excluded. Negative amounts represent tax refunds received from governments
- Royalties are usage-based payments for the right to the ongoing use of an asset

- Fees are typically levied on the right to use a geographical area for exploration, development and production and include rental fees, area fees, entry fees, concession fees and other considerations for licences and/or concessions. Administrative government fees that are not specifically related to the extractive activities or to access extractive resources, are excluded
- Bonuses are payments made when signing an oil and gas lease, when discovering natural resources and/or when production has commenced. Bonuses often include signature-, discovery- and production bonuses and are a commonly used payment type, depending on the petroleum fiscal regime. Bonuses can also include elements of social contribution
- Host government production entitlements are the host government's share of production after oil production has been allocated to cover costs and expenses under a production sharing agreement (PSA). Host government production entitlements are most often paid in-kind. The value of these payments is calculated based on the market price at the time of the in-kind payment. For some PSAs, the host government production entitlements are sold by the operator, and the related costs are split between the partners. For these contracts, Equinor does not make payments directly to governments, but to the operator

### Contextual information at country level

The report discloses contextual information for legal entities engaged in extractive activities in Equinor, as listed below. All information is disclosed in accordance with the accrual accounting principle.

- Investments are defined as additions to property, plant and equipment (including leases), capitalised exploration expenditures, intangible assets, long-term share investments and investments in associated companies
- Revenues associated with the production of crude oil and natural gas related to our extractive activities. Revenues include third party revenues and other income, inter-segment revenues and net income/ (loss) from equity accounted investments. Cost shows the sum of operating expenses, SG&A (sales, general and administrative expenses) and exploration expenses, adjusted for net impairments
- Equity production volumes are the volumes that correspond to Equinor's ownership interest in a field and do not include production of the Norwegian State's share of oil and natural gas

### Contextual information at entity level

The following contextual information is disclosed for all of Equinor's legal entities as of 31 December 2024. The information is structured based on country of incorporation, which is the jurisdiction in which the company is registered.

- Country of operation is the country where the company performs its main activities
- The description of the core business activity is presented according to the business areas where the business operations take place. Each company is associated to a business area as shown in the contextual information at Equinor group level.
- Number of employees (per company) is based on the registered company location. The actual number of employees present in a country can deviate from the reported figures due to expatriation. In some companies there are no employees. These may purchase man-hours from other companies in the Equinor group, as applicable

- Net intercompany interest is the company's net intercompany interest expense (interest expense minus interest income) to companies in another jurisdiction. Interest between companies within the same jurisdiction is eliminated. Intercompany interest is the interest levied on long-term and short-term borrowings within the Equinor group
- Revenues as presented in the Consolidated statement of income in the 2024 annual report include third party revenues and other income, inter-company revenues and net income/ (loss) from equity accounted investments
- Income before tax, as presented in the Consolidated statement of income in the 2024 annual report
- Income tax expense, as defined in note 11 of the Consolidated financial statements in the 2024 annual report
- Income tax paid are reconciled to the amount presented in the Consolidated statement of cash flows in the 2024 annual report and in addition include taxes paid in-kind in Algeria, Libya, and Nigeria

- Retained earnings include the gains and losses accumulated by the companies together with currency translation adjustments and other comprehensive income. Being part of shareholders equity, retained earnings are presented as reported in Equinor accounting system for consolidation purposes
- Retained earnings can be impacted by the dividend paid, group contributions and reclassifications between paid in capital and retained earnings. The retained earnings as presented in this report may be different compared to the figures in the statutory financial statement due to the differences in functional currency and accounting principles for group reporting versus local requirements.
- The parent company's shares in subsidiaries are not considered for impairment when the local statutory reporting is based on accounting principles different from IFRS® Accounting Standards or there are no local statutory requirements for impairment since these effects would be eliminated on the group reporting.

# Consolidated overview

The consolidated overview below discloses the sum (total) of Equinor's payments to governments in each country, according to the payment type. The overview is based on the location of the receiving government.

The total payments to each country may be different from the total payments disclosed in the overview of payments for each project in the report. This is because payments disclosed for each project relate

to the country of operation, irrespective of the location of the receiving government. In 2024, there has been a significant decrease in tax payments mainly due to lower oil and gas prices.

Payments to governments per country related to extractive activities (in USD millions)	Taxes <sup>1)</sup>	Royalties	Fees	Bonuses	Infrastructure improvements	Host government entitlements (in USD millions)	Host government entitlements (mfoe)	Total (value) 2024

1) Taxes paid includes taxes paid in-kind

This report covers payments made directly by Equinor to governments, such as taxes and royalties. Payments made by the operator of an oil and/or gas

licence on behalf of the licensed partners, such as area fees, are included. For assets where Equinor is the operator, the full payment made on behalf of the

whole partnership (100%) is reported. In cases, where Equinor is not the operator, payments are not disclosed, unless the operator is a state-owned entity

and it is possible to distinguish the payment from other cost recovery items. Host government production entitlements paid by the licence operator are reported.

1) Algeria – Includes tax payments in-kind to Sonatrach of 2.8 mmboe valued at USD 150 million.

2) Libya – Includes tax payments in-kind to Tax Department Libya of 0.9 mmboe valued at USD 72 million.

3) Nigeria – Includes tax payments in-kind to Nigerian National Petroleum Corporation of 1.2 mmboe valued at USD 95 million.

4) Equinor has divested interests related to upstream businesses in Azerbaijan and Nigeria with effect from 29 November and 6 December 2024 respectively.

# Contextual information at country level

The contextual information on investments, revenues, cost and equity production volumes is disclosed for each country and relates only to Equinor's entities engaged in extractive activities, covering the

exploration, prospecting, discovery, development and extraction of oil and natural gas. The contextual information reported is based on data collected mainly for the purpose of financial reporting and is reconciled

to the numbers reported for the Exploration and Production segments of Equinor in the 2024 annual report.

## Contextual information per country for Exploration & Production segments

(in USD million)	Investments	Revenues	Cost <sup>2)</sup>	Equity production volume (mmboe)
Angola	408	1,899	311	40
Argentina	292	394	196	7
Azerbaijan	91	188	101	8
Brazil	1,556	1,761	953	28
Canada	50	451	329	5
Algeria	71	491	81	15
UK	698	957	390	12
Libya	6	116	9	2
Mexico	-	-	(2)	-
Nigeria	19	1,084	56	6
Netherlands	-	-	2	-
Norway	6,285	33,645	4,216	507
Russia	-	-	1	-
Tanzania	-	-	12	-
USA	3,862	3,957	1,321	125
Total <sup>1)</sup>	13,339	44,943	7,977	756

1) The total amounts correspond to the sum of the relevant numbers reported in the Exploration and Production segments in note 5 of the Consolidated financial statements in the 2024 annual report.

2) Cost includes purchases, operating expenses, selling, general and administrative expenses, and exploration expenses, without net impairments as presented in the Consolidated financial statements in the 2024 annual report.

# Contextual information at Equinor group level

The table below is an overview of all legal entities in the Equinor group by country of incorporation as of 31 December 2024. It presents the following information per each company: the number of employees, net intercompany interest to companies in other jurisdictions, short description of the company's

activity, revenues including intercompany revenues, income before tax, current income tax expense, income tax paid and retained earnings. The total amounts are reconciled to the Group Consolidated financial statements in the 2024 annual report and prepared in compliance with IFRS Accounting

Standards. The numbers in the Contextual information table based on the country of operation may deviate from the table based on the country of incorporation, as county of operation could be different than country of incorporation. Prior period corrections are reflected in the current year, normally due to statutory reporting

finalized after the annual report. Retained earnings as presented in the table below will be decreased by the dividend paid and increased or decreased by group contributions and reclassifications between paid in capital and retained earnings.

1) Number of employees is reported based on the company's country of operation.

2) Income tax expense as defined in note 11 of the Consolidated financial statements in the 2024 annual report.

3) Income tax paid includes taxes paid in-kind of USD 318 million.

4) All intercompany balances and transactions arising from Equinor's internal transactions, have been eliminated in full. The relevant amounts are included in the consolidation eliminations line. Revenues column: eliminations of intercompany revenues and netting of some intercompany costs. Income before tax column: eliminations of intercompany dividend distribution and share impairment as well as foreign exchange gain on intergroup loan. Income tax expense column: tax effects of certain elimination entries. Retained earnings column: eliminations are mainly related to foreign currency translation effects in the consolidation process. Translation of results and financial position to presentation currency of USD is significantly affected by the investment in subsidiaries which has NOK as functional currency. In turn, those subsidiaries include the results and financial position of their investments in foreign subsidiaries, which have USD as functional currency.

5) Retained earnings at Equinor group level includes currency translation adjustments and OCI from equity accounted investments as presented in Consolidated statement of changes in equity in the 2024 annual report.

To the Board of Directors of Equinor ASA

# Independent accountant's limited assurance report on the Report on payments to governments

## Scope

We have been engaged by Equinor ASA to perform a limited assurance engagement, as defined by International Standards on Assurance Engagements, here after referred to as the engagement, to report on Equinor ASA's Report on the payments to governments (the "Report") for the year ended 31 December 2024.

## Criteria applied by Equinor ASA

In preparing the Report, Equinor ASA applied the Norwegian Accounting Act §2-10, the Norwegian Security Trading Act §5-5a, Forskrift om land-for-land rapportering and the reporting principles as set out in the Report (the "Criteria"); As a result, the information may not be suitable for another purpose.

## Equinor ASA's responsibilities

Equinor ASA's Board of Directors and management are responsible for selecting the Criteria, and for presenting the payments to governments in accordance with that Criteria, in all material respects. This responsibility includes establishing and maintaining internal controls, maintaining adequate records, and making estimates that are relevant to the preparation of the Report, such that it is free from material misstatement, whether due to fraud or error.

## EY's responsibilities

Our responsibility is to express a conclusion on the presentation of the Report based on the evidence we have obtained.

We conducted our engagement in accordance with the International Standard for Assurance Engagements Other Than Audits or Reviews of Historical Financial Information ('ISAE 3000 (Revised)'), and the terms of reference for this engagement as agreed with Equinor ASA on 02 January 2025. Those standards require that we plan and perform our engagement to express a conclusion on whether we are aware of any material modifications that need to be made to the payments to governments in order for it to be in accordance with the Criteria, and to issue a report. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusion.

## Our independence and quality management

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, and have the required competencies and experience to conduct this assurance engagement.

EY also applies International Standard on Quality Management 1, Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services engagements, which requires that we design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

## Description of procedures performed

Procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Our procedures were designed to obtain a limited level of assurance on which to base our conclusion and do not provide all the evidence that would be required to provide a reasonable level of assurance.

Although we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Our procedures did not include testing controls or performing procedures relating to checking aggregation or calculation of data within IT systems.

A limited assurance engagement consists of making enquiries, primarily of persons responsible for preparing the Report and related information, and applying analytical and other appropriate procedures.

Our procedures included:

- Inquiries with management and relevant personnel to obtain an understanding and to evaluate the appropriateness of methods and procedures used in the preparation of the Report;
- Based on our understanding, the use of analytical procedures to identify and discuss any unusual movements in the information presented in the Report compared to the prior year;
- On a sample basis, verification of clerical accuracy and nature of payments disclosed in the Report;
- Reconciliation of the information presented in the Report to the underlying records and documentation on a sample basis;
- Assessment of the appropriateness of the payments in the Report in respect of the defined Criteria; and
- Assessment of the appropriateness of the governing policy (WR2665) related to preparation of the Report.

We also performed such other procedures as we considered necessary in the circumstances.

### Conclusion

Based on our procedures and the evidence obtained, we are not aware of any material modifications that need to be made to the Report for the year ended 31 December 2024, in order for it to be in accordance with the Criteria.
